Check all functions of your firearm after the product is installed and before loading the firearm with live ammunition. If you do not feel competent to perform these checks your local gunsmith can do them for you. Finally, it is important to test fire the firearm after installation of the product but before use in the field to be certain it functions properly and you can handle the firearm safely. All firearms are potentially dangerous; their handling and use may cause property damage, serious personal injury or death. It is your responsibility to safely store, transport, handle, operate and use your firearm. Proper training is available through accredited firearm safety programs.
