MULTICAM

KEY FEATURES

- Built of custom spec'd 500D CORDURA® with Teflon® and PU coatings for maximum durability, UV, and weather protection
- IR Compliant YKK® zippers
- Internal Frame is an HDPE (high-density poly ethylene) sheet that provides rigidity and yet is flexible
- Futura Yoke easily macro adjusts to the torso length allowing the proper amount of stand-off between the back and frame
- BVS – Bolstered Ventilation and Stability system allows for a stable, secure fit over body armor
- Featuring our classic 3-ZIP design for easy, rapid access to the interior.
- Three rows of MOLLE on front panels
- VELCRO® on lid for identification and patches
- Radio inputs, outputs and antennas route easily through the three urethane coated zippered ports
- Water bottle pockets keep hydration handy
- Double-layered bottom for long-haul durability
- Waist belt stows away when not in use

PRODUCT DESCRIPTION

The KOMODO DRAGON is a slightly larger version of our 3 Day Assault for extended time in the field or chronic over-packers. The KOMODO DRAGON uses the Futura yoke to adjust to different torso lengths and accommodate the extra girth of armor. It has the BVS system to make the pack more stable over armor and the bolsters are removable to lower the pack's profile when not wearing armor. Waist belts are easily stowed in the sides of the bag and can use the Livewing padded belt upgrade for heavier loads. It has three internal hydration pockets and a Spadelock mount for attaching accessories.
