

Trijicon ACOG®

There's a reason the Trijicon ACOG® (Advanced Combat Optical Gunsight) is the official medium-distance engagement optic of the U.S. Marine Corps and U.S. Special Operations Forces. And why more than one million have been produced. Each one is specifically engineered to provide increased hit potential in all lighting conditions, while also providing legendary durability and reliability.

- 1 Ruggedized forged housing delivers combat proven durability and reliability
- 2 Bindon Aiming Concept (BAC) features both eyes open shooting for improved situational awareness
- 3 Battery free tritium/fiber optic illumination provides brilliant aiming point in any lighting, LED versions also available
- 4 BDC reticles available in most magnifications along with target-ranging reference points
- 5 Fixed magnifications available from 1.5x to 6x

The Science of Brilliant®

At Trijicon, we are bound by a commitment to industry-leading research, design, and testing to seek innovative aiming solutions that constantly redefine "brilliant." That's why every Trijicon riflescope design is tested to the procedures below.

- > **Alaska-to-Africa Temperature Tested**
To ensure each family of riflescopes is ready for whatever our users put them through, we perform an "Alaska-to-Africa" temperature shock test with temps from -20°F to 140°F.
- > **Solid Zero Tested**
Our riflescopes are designed to hold their zero giving you the precision you need. Every model is subjected to 5,000 consecutive rounds, confirming no reticle shift has occurred.

- > **Drop Tested**
Because we don't believe every drop should be followed by a warranty claim, we drop test each riflescope design to check for durability.
- > **Shock & Vibration Tested**
All riflescope models are tested to withstand recoil and vibrational stresses without malfunction, so it can take a beating before, during, and after use.
- > **Immersion Tested**
All models are immersion tested, and every riflescope is dry-nitrogen filled to eliminate internal fogging.

Features and Benefits

- A Always On, Always Ready**
Most ACOG® models are battery-free, featuring a tritium/fiber optic-illuminated reticle that automatically adjusts the brightness based on available light.
- B Outstanding Clarity**
The quality of the glass and multi-coated lenses maximizes light-gathering capabilities and clear field of view with zero distortion.
- C Rugged Aluminum-Alloy Housing**
Fixed-power design allows for minimal moving parts to create a nearly indestructible sighting system.
- D Exact Target Distances & Holds**
Most ACOG models feature a bullet dropcompensating and target-ranging reticle for decisive aiming.
- E Combat Proven**
No other magnified optic has been used more in combat than the ACOG.
- F Shock-Resistant**
Proven to withstand recoil from a .22LR to a .50BMG and everything in between. Easily passes U.S. Military drop test requirements.

- G Waterproof**
Exceptional waterproof performance. Dry nitrogen-filled to eliminate fogging and tested to perform in both extreme cold and heat.
- H “Both Eyes Open” Design**
Can be used as a CQB sight when shooting “both eyes open” using the Bindon Aiming Concept.
